

## Connecting the Cables for the Promethean Board

Step 1: Make sure the black VGA cable and the red and white audio cables are connected to the white Promethean box where it says “Computer 1.” The white box should be located behind the Promethean board or to the left and/or right of the Promethean board.

Step 2: Make sure to depress the black button for “Computer 1” located on the right side of the Promethean box.

Step 3: Make sure the USB cable is connected to the white Promethean box where it says "USB."

Step 4: Connect the power cable from the Promethean board to a power outlet.
